\$1.5 Billion to Repair Local Community Colleges

For too long, California’s local community colleges have gone without essential repairs and upgrades and our students suffer the consequences. The Community College Chancellor’s Office estimates billions of dollars are needed for repairs over the next five years.

Yes on Prop 2 will make the most urgent repairs and upgrades in our local public schools by authorizing a \$10 billion investment, including \$1.5 for community colleges – without raising any taxes or fees – to make sure our students are safe and ready to learn. Investments from this bond will be matched by local funds.

Prop 2 will:

- Improve local community colleges to ensure students are learning in safe environments free of asbestos, mold, lead paint and leaking pipes.
- Upgrade career technical and vocational education classrooms.
- Give students more opportunities to attend community colleges by expanding access to quality job training and professional development.
- Provide returning veterans access to job training programs so they can secure a college degree or find stable, good-paying jobs.

We strongly support Prop 2
